Mid-Glide Conversion

Part No. 4040, 4041, 4370, 4374 & 3152

World's Finest Products For Harley-Davidsons

- (1) When installing these triple tree sets on 1987-up FXR's, XL's, & Dyna's with stock frames, No modifications are needed. The 5/16-18 x 1/2" long stainless steel cap screws that are installed on the lower triple tree act as fork stops.
- (2) When installing this tree set on frames with removable fork cups, use our optional frame bearing cup set, # 3572. This fork cup set has a built-in fork stop.
- (3) On 2004 & Up Sportsters space out top & bottom trees away from frame neck, with the .156 thick spacers included with 4370, 4374, 4369, 4373 tree kit.
- (4) 2004 & 2005 Dyna's use a 1" diameter axle & axle spacer that's included in kit # 4030 & 4041
- (5) 2008-XL's and 07 Nightsters use a 25mm Axle. Kit # 4373, 4374
- (6) Kits for 1987 to 1999 have disc spacers with 1.984" locating diameter
Kits for 2000 & up have disc spacers with 2.21" locating diameter.
- (7) When installing stem on lower tree, apply Red Loctite on the stem diameter that engages with the lower tree, the same diameter that has the set screw hole. Slide the fork stem into the lower tree, aligning the set screw on the lower tree with the set screw hole on the stem. This puts the stem fork lock groove or hole into the proper position. Tighten set screw.
- (8) Loosen cam-locs, then install them in the 3/4" diameter holes located on the back side of each triple tree, Then slide each fork tube assembly into the triple tree assembly, then tighten each cam-loc assembly.
